PROFESSIONAL SUMMARY

Dedicated and detail-oriented Computer Science undergraduate with hands-on experience in full-stack web development, Java desktop application development, Android application development, and IoT-based systems. Skilled in building user-focused software solutions with database integration, API usage, and real-time system functionality. Currently developing a final-year research project focused on intelligent public safety monitoring using IoT and machine learning. Seeking internship or entry-level opportunities in software engineering, full-stack development, or emerging technology domains.

EDUCATION

BSc (Hons) in Computer Science

SLIIT City Uni (Affiliated with the University of Bedfordshire, UK) | 2025 – Present

Diploma in Computer Science and Software Engineering

SLIIT City Uni | 2023 – 2025

GPA: 3.35 / 4.00

G.C.E. Advanced Level – Mathematics Stream

T/ Orr’s Hill Vivekananda College | 2016 – 2019

G.C.E. Ordinary Level

T/ Orr’s Hill Vivekananda College | 2005 – 2016

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, PHP, C, SQL

Web Technologies: HTML, CSS, React, Node.js, Express.js, AJAX

Mobile & Desktop Development: Android Studio, Java Swing

Databases: MySQL, MongoDB, SQLite, Firebase

Tools & Platforms: Git, GitHub, Visual Studio Code, IntelliJ IDEA, WAMP Server, Raspberry Pi

Concepts: Object-Oriented Programming, Full-Stack Development, REST APIs, Database Integration, IoT Systems, Machine Learning Basics

PROJECTS

Guardian Node – Final Year Research Project | Python, TensorFlow, Raspberry Pi, Firebase, Java

- Designing and developing a smart IoT-based safety monitoring system to detect dangerous sounds such as screams and gunshots in real time.
- Implementing audio classification and event-triggered recording using Raspberry Pi, microphone array, and camera module.
- Developing a cloud-connected alert system to transmit incident details, location, and recorded evidence for faster emergency response.
- Evaluating system performance based on detection accuracy, reliability, and responsiveness during testing.

New Star Kid’s Wear – E-Commerce Management System | React, Node.js, Express.js, MongoDB

- Contributed to the development planning of a web-based e-commerce management system for retail operations, including product, inventory, supplier, and order management.
- Participated in requirement analysis, system planning, risk identification, and software development lifecycle documentation within an Agile team environment.
- Supported the design of business workflows for customer ordering, role-based access, and administrative dashboard functionality.

Driving License Management System | MongoDB, Express.js, React, Node.js, CSS

- Developed a full-stack web application to manage driving license applications, renewals, and user records efficiently.
- Implemented user authentication, administrative dashboard functionality, and CRUD operations for data management.
- Designed a responsive user interface to improve usability and support real-time interaction.

SOFT SKILLS

Problem Solving | Critical Thinking | Communication | Team Collaboration | Time Management | Leadership
